Data on the LNG terminal in winouj cie published on the ALSI platform

GAZ-SYSTEM Capital Group joined the ALSI platform by publishing the data concerning the operation of the LNG terminal in winouj cie. This in turn contributes towards enhanced credibility and transparency of the company's operations and allows to forge strong relationships with the stakeholders.

ALSI is a public platform that makes available aggregated operational data regarding the LNG terminals in the EU. The ALSI platform was developed by the LNG terminal operators as part of their cooperation in Gas Infrastructure Europe (GIE). ALSI is available under the following link: <https://alsi.gie.eu/#/>. ALSI provides daily information on the LNG terminals in the EU. The historical data concerning the terminal in winouj cie dates back to 31 May 2016.

The LNG Terminal in winouj cie is a key component of the Northern Gateway that aims at increasing security and diversification of gas supplies and at developing competitive gas markets in Central Europe and the Baltic Sea region.

Gas Transmission Operator GAZ-SYSTEM S.A. is a strategic company for the Polish economy, responsible for the transmission of natural gas and the management of the most important gas pipelines in Poland. GAZ-SYSTEM S.A. is also the owner of Polskie LNG S.A., a company established to build the winouj cie LNG terminal.

As part of its 2015-2025 investment scheme, GAZ-SYSTEM S.A. is planning to build over 2,000 km of new gas lines in western, southern and eastern Poland. Further expansion of the domestic transmission system, including construction of new gas pipelines being part of the North-South Gas Corridor, as well as construction of interconnections with Lithuania, Slovakia and the Czech Republic, will enhance Poland's energy security and contribute considerably to the development of the European transmission system.

In 2009-2015, GAZ-SYSTEM S.A. completed an investment plan consisting in the construction of over 1,200 km of new gas transmission lines in north-western and central Poland. The projects implemented by the company and the physical and virtual reversal on the Yamal pipeline have translated into a significant increase in technical import opportunities on routes other than from the East.
