

LNG Terminal

The LNG Terminal in winouj cie is an installation designed for:

- unloading LNG from methane carriers with the capacity of 120,000 m³ to 217,000 m³ LNG,
- process storage in LNG tanks of the total capacity of 320 000 m³ LNG,
- LNG regasification with the nominal annual capacity of 5 bcm,
- reloading LNG onto truck cisterns at two dedicated reloading platforms.

Current regasification capacity of the LNG Terminal amounting to 5 bcm/year will satisfy a third of Poland's market demand, while the further development of infrastructure is considered.
