

Annual schedule of works

The LNG Terminal Operator will publish the annual schedule of maintenance works which may affect the operating conditions of the LNG Terminal in winouj cie, possibly restricting the provision of services such as regasification, loading tank trucks, LNG unloading and process storage.

The necessary works on the plant will be performed in the following periods:

- from 06 September 2019 to 15 September 2019 – complete restriction of LNG Terminal's regasification capacity;
- from 13 November 2019 to 19 November 2019 – complete restriction of LNG Terminal's regasification capacity.

The Operator will update the schedule of planned works on the LNG Terminal installation that may affect the provision of services.
