Polskie LNG conducted a technical dialogue on extension of LNG Terminal in winouj cie

On April 11 -12, 2018, the meetings in the form of the technical dialogue relating to the project covering extension of President Lech Kaczyński LNG Terminal are going to be held in winouj cie. They will create an opportunity for the ordering party to examine the most favorable solutions available on the market. Polskie LNG, belonging GAZ-SYSTEM capital group will be represented by Paweł Jakubowski, CEO.

The meetings in winouj cie are going to be attended by representative of organizations operating under EPC formula (engineering, procurement, construction). It is based on a comprehensive performance of an order, including preparation of the investment plan, design and construction works.

Consultations with potential contractors will allow the contracting authority for preparing the tender package, that would fulfill its particular needs.
